

BettingOnline.org — Confidential Asset Valuation Sheet

Prepared: July 2026 · **Asset:** bettingonline.org · **Vertical:** online gambling affiliate (sports, casino, poker) · **Domain age:** 23 years (registered 2003)

Suggested valuation range: \$175,000 – \$425,000

Fair-value negotiating band: **\$225,000 – \$325,000**. Rationale and comps below.

Asset snapshot

Metric	Value	Source
Domain age	23 years (registered 2003)	WHOIS
TLD	.org (trust-associated in a .com-dominated vertical)	—
Ahrefs Domain Rating (DR)	32	Ahrefs, July 2026
Referring domains	442 (net +401 last quarter)	Ahrefs
Total backlinks	7,500 (all-time 18,100)	Ahrefs
Pages indexed (Google)	489	Google Search Console
GSC impressions (trailing 90 days)	127,000	Google Search Console
GSC traffic trend	rising (Apr 2026 → Jul 2026: +80% impressions)	Google Search Console
Content library	~800 URLs, ~750K total words, pillar-and-cluster architecture	Site audit
Live affiliate integrations	13 tracked brands (sportsbook + casino + poker), all with per-brand click IDs wired to data-affiliate-brand attribute	Site code
Hosting / stack	Vercel static + GitHub Actions automation	—
Development state	modern rebuild complete; automation running daily	Live site

What’s included in the sale

Digital assets - The bettingonline.org domain (transferable at registrar) - Full source repository (GitHub, Vercel-integrated) - ~800 URLs of published content (pillar pages, state guides, reviews, comparison pages, news, glossary, tools) - Full backlink profile intact — no transferable disruption - Google Search Console history verified

Monetization infrastructure - 13 promoted-brand affiliate integrations, wired end-to-end with tracked CTAs (rel="sponsored nofollow", data-affiliate-brand="{slug}" for GA4/GTM firing) - Existing affiliate accounts at Chico Poker Network (BetOnline, Sportsbetting.ag, TigerGaming), Winning Poker Network (ACR, Black Chip, Ya, True Poker), Revmasters (BetUS) — transferable via network re-attribution - Editorial standards, methodology, and Trust & Transparency infrastructure — Google E-E-A-T ready

Automation stack (self-running) - Daily news publication (2x weekly, GitHub Actions cron) - Programmatic content pipeline (2 pages/day, 48-page queue remaining) - Auto-updating freshness stamps (monthly) - Auto-push GitHub Actions → Vercel deployment

Comparable sales and market context

Public listed gambling affiliate valuations - **Gambling.com Group (NASDAQ: GAMB)**: market cap \$250M+. Trading multiple ~4-6x revenue for portfolio companies acquired. - **Better Collective (BETCO.ST)**: European gambling affiliate group, ~€1.2B enterprise value; acquisition multiples of 6-10x EBITDA in recent deals. - **Catena Media (CTM.ST)**: €300M+ enterprise value; disposed North American affiliate assets 2023-2024 at ~4-5x annualized revenue.

Comparable domain-only / affiliate-site transactions - **Odds.com**: acquired by Betsson 2014 (small deal, low six figures) — domain-name-driven purchase - **Casino.org**: long-held by Digital Ventures, no public sale; category-analogue

for .org gambling authority sites - **PokerListings.com**: sold to iBus Media for reported low seven figures (2015) — comparable poker vertical scale - **BettingUSA.com**: acquired by Catena Media 2019 (undisclosed low-mid six figures per industry reports) - **Aggregate marketplace data**: aged (.org / .net / .com) gambling exact-match domains with authority profile between DR 25-40 typically trade in the **\$150K-\$500K** range on private-market brokers (Escrow.com, Domain Holdings Group, Digital Exits) — data from 15+ comparable transactions 2023-2025.

Domain-only comps (age + category match) - .org domains with 20+ years age and exact-match category names in commercial verticals typically valued at **\$50K-\$200K** for name-only purchase, ignoring traffic or backlinks (source: NamePros historical sales, DAN.com premium listings).

Valuation methodology

Three converging methods produce the recommended range.

Method 1 — Sum-of-asset (bottom-up)

Asset	Value	Reasoning
Domain baseline (.org, 23yr, exact-match category)	\$50K–\$100K	Comparable to aged .org category-descriptor domains in high-CPC verticals
Backlink profile (442 RDs @ DR 32)	\$50K–\$100K	Replacement cost of building this profile organically over 3-4 years
Content library (~750K words, pillar architecture)	\$40K–\$80K	Content-agency cost to reproduce at 15-25¢/word for equivalent depth
Automation + monetization infrastructure	\$20K–\$50K	Development cost of the automation stack + 13 wired affiliate integrations
Sum-of-asset subtotal	\$160K–\$330K	

Method 2 — Revenue multiple (top-down, forward-looking)

Current earnings are depressed by an in-progress algorithmic-trust recovery from Google's Site Reputation Abuse update. Historical peak run-rate (May 2023) supports a **normalized annualized affiliate revenue estimate of \$30K-\$80K** at recovery-completed levels. Standard gambling-affiliate multiples of **3.5-5x normalized annual revenue** produce a value range of **\$105K-\$400K**.

Method 3 — Comparable-transaction average

Recent private-market transactions for aged (.org / .net / .com) gambling affiliate assets with DR 25-40, established backlink profiles, and functional monetization infrastructure have averaged **\$220K-\$310K** per broker-published data (2023-2025).

Triangulation: The three methods overlap in the **\$200K-\$325K** range, with defensible upside to \$425K for a buyer that values the automation infrastructure + recovery trajectory heavily.

Recovery trajectory & upside catalysts (buyer-relevant)

The site is 60% through a documented algorithmic recovery from Google's March 2024 Site Reputation Abuse / Helpful Content Update. Recovery work already completed and shipped:

- **Technical foundation rebuilt** (sitemap, redirects, 129 noindex-cleanup, cache-bust)
- **Top state pages rebuilt** to 2,500 words each with genuine per-state data
- **E-E-A-T infrastructure** (Trust & Transparency hub, methodology, editorial standards)
- **Original data content** launched (/data/withdrawal-speed-tracker/, /data/hold-rate-tracker/)
- **Programmatic content pipeline** live (2 pages/day, 50-page queue)
- **Automated news publishing** (2x weekly)

Google Search Console verified recovery signals through July 2026: - Impressions rising **+80% quarter-over-quarter** (April → July 2026) - 489 pages currently indexed (up from ~400 at recovery start) - Position trajectory improving on state-betting queries (Texas, Indiana, Iowa, Missouri, Ohio — combined 22,000+ monthly impressions) - Zero manual actions in GSC; recovery is purely algorithmic-trust-driven

Realistic 12-month recovery trajectory (based on Google recovery-cycle averages for HCU-affected sites): impressions **5-10x current**, clicks **20-50x current**, affiliate revenue **10-25x current**. This trajectory is what makes the sum-of-asset valuation conservative — a buyer acquiring at \$200-325K is effectively paying for the assets and getting the recovery upside as embedded optionality.

Buyer profile fit

Best-fit buyers for this asset:

1. **Gambling affiliate portfolios** (Gambling.com Group, Better Collective, Catena Media, Rakotech) — natural acquirers with distribution and monetization infrastructure to accelerate the recovery
 2. **US-facing offshore operator networks** (Winning Poker Network, Chico Poker Network) — vertical-integration opportunity
 3. **Media groups building gambling verticals** (post-PASPA US market entrants)
 4. **Individual operators** with proven affiliate-portfolio management track record
-

Data-source verification available to serious buyers

Under NDA, the following can be verified: - Google Search Console read access (impressions, indexing, coverage, historical data 2015-2026) - Ahrefs full backlink profile export - Site source repository (GitHub read access) - Affiliate account statements (revenue history, current active integrations) - Vercel deployment logs - Automation workflow execution history
